### Identifying the Wheel Rim

Before identifying the wheel rim you must first identify which axle is fitted to the vehicle, across the Transporter range we have used various axles, to correctly identify the axle look at the hub cap, please see the examples below, the manufacturers logo should be identifiable.

**SAF**

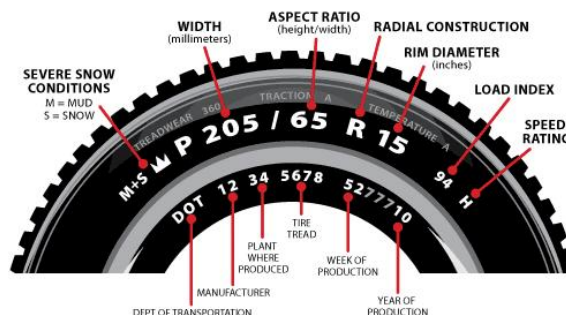

**Gigant**

**SAE**

Once you know which axle is fitted you should then check the tyre size:

With this information you will be able to select the wheel you require from the table below:
