

TRANSPORTER

Engineering Excellence

KNOWLEDGE IS KEY Become an approved **TRANSPORTER** repairer

Transporter Engineering Ltd are offering training courses for groups of 2 to 6 technicians run from their factory in Gosfield, Essex. The Product Familiarisation Training course is aimed at the workshop technician to provide an inclusive introduction to the routine maintenance of the Transporter Engineering equipment. Covering all from grease points not to be missed, through to the internals of a hydraulic control valve, this course will help provide the know-how to adequately keep your customers vehicle on the road. The course includes a tour of the factory to show the attention to detail that goes into each and every car transporter before drilling down into the more intricate nature of the Transporter Engineering equipment. A workshop manual is provided to the group of participants along with an individual certificate to prove each technician has attended an approved Transporter Engineering Ltd course.

Course Schedule

- 09:30 Arrival at Transporter Engineering Ltd, Gosfield, Essex CO9 1SA
- 09:35 Introductions
